## Additional information

....

Full text of classification: see section 16

## 4. First-aid measures

. .

#### 4.1. Description of first aid measures

#### **General information**

In all cases of doubt, or when symptoms persist, seek medical advice. In case of unconsciousness give nothing by mouth, place in recovery position and seek medical advice. In case of irregular breathing or respiratory arrest provide artificial respiration.

#### Following skin contact

After contact with skin, wash immediately with plenty of water and soap.Remove contaminated, saturated clothing immediately.

## After eye contact

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

#### After ingestion

Seek medical advice immediately.Do NOT induce vomiting.

## 4.2. Most important symptoms and effects, both acute and delayed

In all cases of doubt, or when symptoms persist, seek medical advice.

#### 4.3. Indication of any immediate medical attention and special treatment needed

## 5. Firefighting measures

## 5.1. Extinguishing media

Suitable extinguishing media

Foam Water mist Carbon dioxide

Extinguishing media which must not be used for safety reasons:

strong water jet

5.2. Special hazards arising from the substance or mixture Gases/vapours, toxic

## 5.3. Special protective equipment for firefighters:

Provide a conveniently located respiratory protective device.

### Additional information

The danger areas must be delimited and identified using relevant warning and safety signs. Cool closed containers that are near the source of the fire.Do not allow water used to extinguish fire to enter drains, ground or waterways. Treat runoff as hazardous.

## 6. Accidental release measures

## 6.1. Personal precautions, protective equipment and emergency procedures

Keep away from sources of ignition. Ventilate affected area.Remove persons to safety. Do not breathe vapours.See protective measures under point 7 and 8.

## 6.2. Environmental precautions

Do not allow to enter into surface water or drains. If the product contaminates lakes, rivers or sewages, inform competent authorities in accordance with local regulations. Provide good ventilation.

## 6.3. Methods and material for containment and cleaning up Isolate leaked material using non-flammable absorption agent (e.g. sand, earth, vermiculit, diatomaceous earth) and collect it for disposal in appropriate containers in accordance with the local regulations (see chapter 13).

## 6.4. Reference to other sections

Observe protective provisions (see chapter 7 and 8).

## 7. Handling and storage

## 7.1. Precautions for safe handling

Article No.:	#3	3 Screen Degreaser
Print date	16.09.2015	Revision date 16.09.2015
Version	1.1	Issue date 14.07.2015

EN Page 3 / 6

## Advices on safe handling

Heed the usual precautionary measures of handling chemicals. Avoid: aerosol or mist formation

## 7.2. Conditions for safe storage, including any incompatibilities

## Technical measures and storage conditions

Keep container tightly closed in a cool, well-ventilated place. VCI-storage class, see Chapter 15

#### Requirements for storage rooms and vessels

Always keep in containers that correspond to the material of the original container. Ensure adequate ventilation of the storage area.

## Additional information

VCI-storage class, see Chapter 15

## 7.3. Specific end use(s)

Observe technical data sheet. Observe instructions for use.

## 8. Exposure controls / Personal protection

## 8.1. Control parameters

## Occupational exposure limit values:

2,2'-iminodiethanol INDEX No. 603-071-00-1 / EC No. 203-868-0 / CAS No. 111-42-2 MEL/OES, TWA: 13 mg/m3; 3 ppm

#### Additional information

TWA : long-term occupational exposure limit value STEL : short-term occupational exposure limit value Ceiling : peak limitation

## 8.2. Exposure controls

Provide good ventilation.

Personal protection equipment

## **Respiratory protection**

If concentration of solvents is beyond the occupational exposure limit values, approved and suitable respiratory protection must be used. Observe the wear time limits according GefStoffV in combination with the rules for using respiratory protection apparatus (BGR 190).

## Hand protection

Chemical resistant protective gloves: DIN EN 374 Recommendation for contact by spatter: Protection Index 2 Permeation time >30 min., e.g. butyl rubber 0,4 mm Recommendation for direct contact: Protection Index 6 Permeation time >480 min., e.g. nitrile rubber 0,4 mm

### Eye protection

Wear closed protection glasses. DIN EN 166

## Protective clothing

## **Protective measures**

Avoid contact with skin, eyes and clothes. After contact clean skin thoroughly with water and soap or use appropriate cleanser.

## Environmental exposure controls

Do not allow to enter into surface water or drains.

## 9. Physical and chemical properties

9.1. Information on basic physical and chemical properties Appearance: Physical state liquid Colour refer to label Odour characteristic

Eye Dam. 1 / H318

Classification for mixtures and used evaluation method according to regulation (EC) 1207/2008 [CLP]

Serious eye damage/eye irritation

The information supplied on this safety data sheet complies with our current level of knowledge as well as with national and EU regulations. Without written approval, the product must not be used for purposes different from those mentioned in chapter 1. It is always the user's duty to take any necessary measures for meeting the requirements laid down by local rules and regulations. The details in this safety data sheet describe the safety requirements of our product and are not to be regarded as guaranteed attributes of the product.
