# **Rutland™ CHILL LOW CURE COLORS**

Rutland Low Cure Colors are designed to print on Cotton, or on Poly blends and Polyester with the appropriate Chill under base. Chill colors are vibrant and bold with a matte finish. These inks demonstrate amazing printability on both manual and automatic presses. This ink series is suitable for wet-on-wet printing dependent on art separation and screen imaging quality.

#### **Highlights Printing Tips** Wide cure temperature range from 270°F/132°C to 320°F/ For printing on cotton: Print direct or over a cotton white 160°C underbase. For Blends or Poly, print over the appropriate Chill under base. Chill colors are vibrant and bold with a matte finish and soft hand. For sublimated and/or migration-prone polyester fabrics, use Ready for use out of the bucket, just pre-sheer and print. the Rutland Low Cure Barrier Gray as a base layer to achieve maximum bleed resistance. Wet-on-wet capable. Use 86-230t/in (34-90t/cm) mesh screens for best Energy savings and extra stability on problem fabrics. performance and opacity. Adjust flash cure temperature and dwell time so ink is just dry Works well on manual or automatic presses. to touch but tacky. Avoid excessive flash temperatures to protect fabric and migration of dyes. Depending on flash unit, a 3 - 5 second flash is adequate. Compliance Non-phthalate Test all prints for color fastness and print durability before starting. Internationally compliant Curing is a time and temperature process. Using a lower Visit www.rutlandinc.com for more information temperature, at a lower belt speed will provide the best result without damaging the fabric. Lower cure does not mean you can increase belt speed. Ink still needs time to cure. 60 **Precautions** second dwell time/6-8 seconds at Cure temp. The information provided in this document is given in good faith Add up to 10% of LC0000 Chill Relax Extender to extend the and does not release you from testing inks and fabrics to confirm LC colors and whites. suitability of substrate and application process to meet your

## **Recommended Parameters**

customer standards and specifications

#### **Fabric Types**

Cotton, Tri-blends, Cotton/Poly Blends, Polyester

## Flash & Cure

Flash: 150°F (66°C) Cure: 270°-320°F (132°-160°C)

#### Clean Up

Non-phthalate press wash

## Mesh

Count: 110-305t/in Tension: 25-35n/cm2

## **Pigment Loading**

#### **Health & Safety**
