Tek-404 Screen Rejuvenator

Description

Tek-404 Screen Rejuvenator is a biodegradable, 100% water soluble formula, manufactured for the removal of the heaviest haze and ghost images, caused by UV, epoxy, plastisols, stencil, conventional and solvent based ink residues.

Application

Tek-404 Screen Rejuvenator, when used in combination with a Tek Screenwash of choice, is a powerful and exceptionally effective haze and ghost remover. This product contains a degreasing agent resulting in a clean and oil free screen after rinsing. The use of Tek-404 instead of heavy caustic pastes will greatly increase the life of screen fabric. (Please refer to the MSDS for this product.)

Characteristics

Tek-404 Screen Rejuvenator has a higher caustic content, up to 12% and is readily biodegradable with no VOC emissions. This product, when used as directed, is a safe product, however, large spills should be cleaned and treated in compliance with local governmental regulations.

1- Light to Medium Stains

Apply Tek-404 Screen Rejuvenator to both sides of the screen, wait 5 to 10 minutes, then apply a Tek Screenwash of choice to both sides. Wait another 2 to 5 minutes and remove with a high pressure water system, starting from the bottom of the screen, slowly working your way up, from side to side.

2- Heavy and Old Stains

Apply Tek-404 Screen Rejuvenator to both sides of a dry screen allowing the product to dry completely. Apply a Tek Screenwash of choice to both sides, wait 3 to 5 minutes and remove with a high pressure water system, starting from the bottom slowly working your way up, from side to side.

NOTE: Due to fabric wear, improper stretching, or mesh counts of 280 TPI or more, the use of Tek-404 could result in fabric breakage, as with any other caustic haze remover.

Packaging

Tek-404 is available in

- 4 ltr Jugs,
- 20 ltr Pour Spout Pails
- 210 ltr Drums
